OWYHEE COUNTY MINES

Wonderfully Rich Strikes in the District Near Silver City.

MOUNTAINS OF MINERAL

Great Bodies of Ore Uncovered-Fortunes for Miners-Among the Prospects at DeLamar.

Special Correspondence of the Standard.

SHVER CITY, Idaho, April 7.—This camp is now in high spirits over several wonder ful strikes made in the mines during the past week. The biggest of these has been made in the Phillips & Sullivan, on Florida mountain. The owners are now taking ore out of a ledge twenty feet wide in which there is a streak 18 inches wide which has just been carefully sampled and an assay made which is well calculated to set the whole comp wild. The assay reads, gold \$47.10, silver \$234.60 per ton. This prompts the STANDARD's correspondent to give a description of the mine and to locate the spot in it where this strike was made. The Phillips & Sullivan property originally con-Finings & Sillivan property originally consisted of two claims, upon the west side of Florida mountain, located in a group of good mining properties, among which are the Black Jack, Empire State, Boonville, Seventy Nine and others, all of which are or have been good producers. One of these claims was located by Ike Phillips and the other by his partner, John F. Sullivan, hence the name given to their consolidated properties. They were located four years ago and a shaft was sunk a few feet deep and some ore taken out at a prospect near the surface. Then the owners leased the mine for six months to some miners, giving them the privilege of sinking the shaft 50 feet deeper and drifting on the ledges, but restricting them to not making the shaft more than 10 feet wider nor their drifts more than seven feet high. The leasers made \$50 per day per man while sinking the shaft and made money while running the drift. They run it south from the shaft and in ore which carried principally silver. The owners, when they again assumed work on the mine after the expiration of the lease, ran a crosscut tunnel and cut the ledge some two hundred feet further north, where they found it nine feet wide but low grade. They then, uncertain which carried the rich ore, the big ledge or a small one which they had out sixty feet before they had reached the larger one,deeided to drift south on the stringer to get under the shaft out of which ore had been taken. Here is where they made a big mistake, for when they had drifted far enough south to have brought them under the shaft they were still sixty feet west of it, and had to crossent to reach the ledge.

This they did, and for the past year have been extracting ore from the bottom of the shaft south. This has been paying them splendidly, they having been the beaviest shippers of bullion from the camp for the past year.

A short time ago John D. Ludwig, man-ager of the Stoddard mine at De Lamar, was employed by parties in Paris, France, to expert the Phillips & Sullivan property for them, and while doing so, be advised the owners to start a drift north from the shaft at a point nearly opposite where the original leasers had started to drift south, giving it as his opinion that the richer part of the shoot of ore was north of the shaft instead of south of it, where all the work had been done. They have just recently acted on this advice, and the shot put in began to show one carrying more gold, and the first 10 fe + brought them into ground which makes the showing given in the beginning of this letter. How long this im-mensely rich streak may hold out is, of a splendid ledge in the bottom of a hundred course, only a matter of conjecture; but there is a big stretch of unexploited ground above, below and north of the find, and ers suspended work in the shaft and comit don't take much of a shoot of such ore to insure the expers an ample for-will cut the ledge two hundred feet below tune. They are two gentlemen whom everybody who knows them rejoices in their good luck. Southwest of and adjoining the properties above described the Fame gentlemen own another mine, called the Belfast. They have cut the ledge on this property at a much greater depth than on the former by a crosscut tunnel 700 feet long, started much lower down the side of the mountain. They have a good ledge on the Belfast and have appar ently put more faith in its turning out big than in the other mines. The Belfast tun-nel will eventually be used as the main working tunnel for the group. Through it the group can be worked to a great depth without pump or hoist.

other rich strike to report. It is in the Ruth mine, on War Eagle mountain. The Ruth is on a ledge which runs diagonally across the famous Poorman ledge, cutting the latter at the point where the shaft was sunk on it more than 20 years ago, out of which \$6,000,000 were taken. The Ruth vein is known as the Empire, east of the Poorman, and as the Glenbrook west of it, the Ruth claim being the northwestern continuation of the claim and located much lower down the side of the mountain. A year ago the Ruth was purchased by a party, partly upon its merits as a pro-ducer and partly because by running a tunnel 3,000 feet long and following the ledge the tunnel would cut all the ledges converging at the Poorman shaft at great depth, and in fact was a good point from which to run a tunnel entirely through the mountain, cutting fully one-half of all its known ledges. The owners started their tunnel at the extreme end of their claim, which would make it 3,000 feet long to the Poorman vein, it having to be run the entire length of the Ruth and Glenbrook to reach that point. It is now in on the ledge some 500 feet and is very rich. They have cut into a shoot of ore wider than the tunnel and 18 inches of the vein assays \$2,000 per ton. This rich strike was not unexpected, for, 200 feet directly above where the rich ore was struck a shorter tunnel had cut a shoot of ore where \$30,000 had been taken out in three weeks' time from a six-inch streak. which pinched out on the bottom and led the then owners to consider the property worked out. It can now be again scored as one of the big mines of War Eagle.

The STANDARD correspondent has an-

Here is more for the STANDARD's readers-the Poorman company has cut this same Glenbrook vein 100 feet northwest of the old Poorman shaft, and is drifting towards the Ruth on the vein, taking out the richest ore found on the company's property since it came into possession of the present owners. The vein is of good width and is said to run upwards of \$300 The points worked on the Ruth and Glenbrook are 2,500 feet apart, and the workings on the latter is, vertically, 350 feet higher than the Ruth tun-

nel. It is all virgin ground between those two points except the work done on the Ruth, years ago, which is mentioned

above.
"I have always said and I still believe that War Eagle mountain is the richest spot in Idaho," was the remark made by a well known mining man, yesterday, when he and others were talking of these finds, "when they do strike it they strike it rich."

AT DE LAMAR.

Prospectors Jubilant Over Discoveries-A

Bright Outlook.

DELAMAR, Idaho, April 5.—The second day of this month closed one year's operations of the DeLamar mines under the ownership of the DeLamar Mining company (limited) of London, and under the management of Capt. John W. Plummer, formerly manager of the Granite Mountain mines and still in charge of the Elk-born mines of Montana. The first two days of this month the mill was shut down for a general clean-up to close the year, and this, with the exception of one other stop for the same length of time, during which an entire new power was hitched on to drive all the machinery in the mill, was the longest stoppage made furing the year. When the manager's report for the year is furnished to the pub-lie it will be an interesting one. In the meantime the STANDARD correspondent can forestall the said report with some of the facts it will doubtless set forth. The mill has been enlarged by the addition of ten stamps, additional pansand settlers and other improvements the mill has been about doubled in capacity. The output shown by the monthly reports has stendily increased, and was larger during the last month than any former one. While this will make interesting reading for the share holders they will be much more gratified when they read the statements which will be made concerning the results of the development work which has been done in the mines. One year ago all the ore milled or shipped was aken from the Vosbay tunnel, which was up until a few weeks ago, the main working tunnel of the mines. More recently the Wahl tunnel has opened up all the large portion of the ore is now extracted below the older workings. It is richer by 50 per cent, than the mineral taken from above, thus demonstrating the very important fact that the mineral increases in values as greater depth is at-tained. Increased milling capacity is now all that is required to make this property one of the greatest producers in the entire country, as it is now the great-est producer in Idaho. Everybody here is anxious to hear that the company will soon begin the work of constructing the new and larger mill, the plans of which have already been prepared and improved.

The STANDARD correspondent has been promised a synopsis of the forthcoming eport of the manager at the earliest pos report of the manager at the earliest pos-sible date, and anticipates that it will make interesting reading for people en-gaged in mining pursuits.

A great deal of work is being done on

numerous other properties upon the same mountain upon which the DeLamar mines are located, and many of the owners are confident that they will achieve a success second only to that made by this great property. The Stoddard mine, east of and djoining the DeLamar's richest claims. has been bonded for the past two years to Senator Jones of Nevada, who has kept a small force of men working on it during that time, and its prospects now look very promising. The How Manhattan property, which adjoins the DeLamar on the west and the Chautauqua, still further west, are here regarded as great properties. The latter it is reported has within the past week cut a big and very rich vein in a cross cut tunnel upon which they have been working for the past two years. The Alta, just north of the last mentioned, developed foot shaft, several months ago, but had so much water to contend with, that the ownthe bottom of the shaft and which it will take them several months yet to complete. The Garfield, half a mile further west, which is bonded to John M. Burke and W. H. Taylor, of Spokane, now has a twelve hundred foot tunnel upon it and the manager is now daily expecting to cut the vein, which nearer the surface is a large one and has produced some very rich ore. There are dozen other claims between this claim and the DeLamar upon which more or less development work is being done. Every one of the owners of these claims are confident that they have as good a showing as the DeLamar had at the same stage of development, and every one interested in the camp hopes to see some of them become as great producers as the DeLamar. which will demonstrate that this mountain is what many fondly call it and believe

Case Compound Myopic Astigmatism. MELEOSE, Mont., June 18, 1890, Messrs, Leyson & Turck.

DEAR SIRS Having for about a year been DEAR SHIS—Having for about a year been troubled with weak eyes and poor eyesight, I some time in April last called at your store and had my eyes examined by Mr. Leyson for the purpose of having glasses fitted to them. I then purchased a pair for distance reading, and two weeks later another pair for reading. I have now given the glasses a fair test and find them so entirely what I needed that I can not only see very much better while wearing them, but my eyes from their use, have already become so much stronger that I them, but my eyes from their use, have already become so much stronger that I can see better with the naked eye than I could before, I consider this latter fact an important one in your favor and desire to express my hearty approval of you as an optician and wish that all who need glasses may receive the benefit of your skill. Yours respectfully.

OSCAR WELLS,

Principal Public Schools.

Round Trip Tickets. The Great Northern railway is selling round trip tickets to St. Paul, Chicago and St. Louis, good to return via same or an-other route from St. Paul or Chicago, J. E. Dawson, general agent. Office, 106 Main street.

BUTTE CITY, Mont., Aug. 20, 1890,

Mr. Leyson, Butte City: Dear Sir—Have been wearing for the past year a pair of glasses fitted to my past year a pair of glasses fitted to my sight by you which has given me perfect satisfaction, which I have been unable to obtain in Eastern and Southern cities.

My eyes have been such that skilled opticians have failed to suit them. Allow me to compliment you on your superior knowledge as an optician. Respectfully.

Sout Cont. Respectfully.

BOZEMAN AFFAIRS. A Change in the Affairs of the Electri

Company-Other Notes. Special Correspondence of the Standard.

Bozeman, April 9.—Members of the fire

BOZEMAN, April 9.—Members of the free department will give a bail on the 18th inst., and arrangements have been made for a large attendance.

The Madison County Monitor rises Phoenix-like over the ashes of the late Pony Express, and is bright, crisp, full of interesting news and well printed. The editor, Frank Yerkes, was one of Bozeman's most practical men with both the "stick" and pen, and we predict for him excellent pen, and we predict for him excellent achievements in the Pony district.

The Bozeman Flouring Mill company have purchased land in the Imes addition, where they have decided to locate the mil

A. M. Seifert arrived from New York on Thursday, having accepted the position of manager of the West Gallatin Irrigation company, thereby relieving Charles A. Gregory, who had charge of the company last year. Mr. Gregory will continue with the company as a general superintendent. Mr. Seifert informs us that President Altenbrand and Mr. Gregory will visit this section to look after the progress of the ilies of Hollanders will reach Manhattan within a couple of weeks.

A deal of great importance to the resi-dents of Bozeman and the Gallatin valley was consummated here on Wednesday last. It was the transfer of the plant and franchise of the Bozeman Electric Light company to the Gallatin Light, Power and Railway company, a new organization whose field of operations will embrace a much wider scope than that of the old concern. In addition to giving Bozeman a greatly improved light service, the new company will furnish power for mechanical and manufacturing purposes, and for anything else that may require electric power. The old water plant will be greatly enlarged and improved and to insure constant and effective service a steam plant

will be added as an auxiliary.

Another purpose of the new company is to build and operate an electric street car line. An ordinance granting right of way and governing the construction of the line was passed some time ago. All the terms of the ordinance have been agreed to by the company, and a bond of \$5,000 has been filed with the city clerk to have the read in operation within the specified time: viz: August 12. The construction of the

The officers of the company are W. G. De Celle of St. Paul, president; W. H. Clark of Helena, vice president; C. J. Clark of Helena, secretary; S. M. Houghton of Minneapolis, treasurer. H. M. Ogden is resident manager and will have entire charge of the electric light plant as well as of the construction of the street resilvar.

A Lumberman's Rendesvous.

This term might be applied to Stevens Point, lecated on the Wisconsin Central lines, at the gateway to the vast forest region which extends north to Lake Superior, a distance of 200 miles without a break, on account of its vast lumber interests. The Wisconsin river, to which the lumbermen have given the familiar and somewhat affectionate title of "Old Wiscons," not alone acts as a lumber feeder to the city by furnishing through its numerous tributaries an outlet for thousands of acres of pine in the upper country, but it furnishes a water power that is second to that only of Neenah and Menasha, which cities are also located on the "Central." Millions of feet of lumber are cut every year, giving employment to A Lumberman's Rendezvous. are cut every year, giving employment to hundreds of men. In addition to the lum-ber trade, it has numerous other manu-factories; it is here where the large car shops of the Wisconsin Central lines are

located.
For tickets, maps, pamphlets and full information apply to G. F. McNeill, G. P. & T. A., Minneapolis, Minn., or to James C. Pond, G. P. & T. A., Chicago, Ill.
